THE ECONOCRACY

The perils of leaving economics to the experts

'If war is too important to be left to the generals, so is the economy too important to be left to narrowly trained economists. . . This book demonstrates just why that matters and offers thought-provoking ideas on how to go about it.'
Martin Wolf, Associate Editor and Chief Economics Commentator at the *Financial Times*

'A rousing wake-up call to the economics profession to re-think its mission in society, from a collective of dissident graduate students.'
Lord Robert Skidelsky, Professor Emeritus of Political Economy at Warwick University and a Fellow of the British Academy in History and Economics

'Many economists will not agree with all of the book's analysis but they certainly should not ignore it.'
Diane Coyle, Professor of Economics at the University of Manchester and former Vice Chair of the BBC Trust

'Every economist and citizen should get a copy.'
Vince Cable, former Secretary of State for Business, Innovation and Skills

'Beautifully written and packed with wisdom...this may be the most important economics book of the decade.'
Mark Buchanan, physicist, former editor of *Nature* and *New Scientist* and author of *Forecast: What Physics, Meteorology, and the Natural Sciences Can Teach Us About Economics*

One hundred years ago the idea of 'the economy' didn't exist. Now, improving the economy has come to be seen as perhaps the most important task facing modern societies. Politics and policymaking are conducted in the language of economics, and economic logic shapes how political issues are thought about and addressed. The result is that the majority of citizens, who cannot speak this language, are locked out of politics while political decisions are increasingly devolved to experts. *The econocracy* explains how this situation came about – and its damaging consequences. It opens up economics and demonstrates its inner workings to the wider public so that the task of reclaiming democracy can begin.

Joe Earle, Cahal Moran and Zach Ward-Perkins are founding members of the Post-Crash Economics Society at the University of Manchester
