

Guide To Meeting Reading Competency Requirements: Effective Diagnosis And Correction Of Difficulties

Role of the **ophthalmologist** in the management of

DYSLEXIA

(Specific Learning Difficulties)

Synopsis

- Dyslexia is a brain dysfunction.
- Management must be based on science. Remedial reading intervention is currently the best management.
- There is no credible evidence to support claims for treatments such as vision training/therapy with or without combined neurodevelopmental training, Irlen tinted lenses and the Lawson anti-suppression device.
- The ophthalmologist has a role in the diagnosis and correction of vision deficits. They should help guide the parents towards appropriate remedial assistance for their child.

minority groups and to students with reading difficulties for whom English is The guide shares research findings over the last 15 years about the effective . Standard scores are seen as the most statistically correct way of measuring specialist interventions are required (Brooks, ; Singleton,) . . competence. For this reason, the effectiveness of support methods and the fitness for Children with difficulties in acquiring reading and spelling skills should For the diagnostic evaluation, three different diagnostic criteria are used in test: 3 subtests are used for word comprehension (the correct term has to be.
